Good Morning Qian,

Yesterday, we received the expedited laboratory analyses for oil and grease samples collected from our NPDES discharges (WY0000779 Maverick Springs and WY0000922 Chatterton) on the Wind River Reservation in response to the citizen complaint received during the night of June 20, 2021. The laboratory analysis of these samples document the effluent was compliant with the permit limits and confirm no permit violations occurred. Merit Energy Company and our contractors responded to the call with extreme urgency, considerable resources, and professionalism. Based on the data collected, site observations, and subsequent investigation, no evidence exists to support any aspect of the complaints that were reported. These results will be reported in the 1st semester Discharge Monitoring Reports (DMRs), due by July 28, 2021. Unless otherwise directed, no further action appears warranted.

Sincerely,
Mike
